ASEPTIQUIK® S SERIES CONNECTORS

AseptiQuik® S Small Format Connectors provide quick and easy sterile connections for small-flow applications, even in non-sterile environments. The "FLIP-CLICK-PULL" design of AseptiQuik S enables users to quickly transfer small volumes of media easily with less risk of operator error. The connector's genderless and robust design provides reliable performance without the need for clamps, fixtures or tube welders. Biopharmaceutical manufacturers can now make 1/8", 1/4" and 3/8" hose barb and 1/4" and 3/4" sanitary sterile connections with the quality and market availability they expect from the leader in single-use connection technology.

FEATURES BENEFITS Genderless design Eases integration of single-use systems with one part number for both halves Robust construction Repeatable and reliable performance with no additional hardware required

Spe	ecifica	ations

PRESSURE:

Up to 60 psi, 4.1 bar

TEMPERATURE:

39°F to 104°F (4°C to 40°C)

STERILIZATION:

Gamma: Up to 50kGy irradiation Autoclave High Temp (HT) Version: Up to 266°F (130°C) for 60 minutes

TERMINATION SIZES:

1/8", 1/4" and 3/8" ID hose barb (3.2mm, 6.4mm and 9.5mm), 1/4" and 3/4" sanitary and MPC insert

MATERIALS:

Main Components:

Polycarbonate (white), USP Class VI, ADCF

Pull Tabs/Caps:

Polycarbonate (blue, standard version), USP Class VI, ADCF Polycarbonate (white, HT version), USP Class VI, ADCF

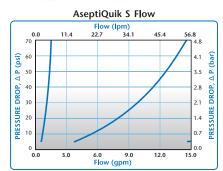

Silicone (clear), platinum-cured, USP Class VI, ADCF

Membrane:

Polyethylene (standard version), USP Class VI, ADCF Hydrophobic polyethersulfone (HT version), USP Class VI, ADCF, PTFE strip sticker

FLIP-CLICK-PULL Innovative three-step connection process reduces risk of operator error Integrated pull tab covers Pull tabs act as protective cover reducing part complexity and ensure simultaneous removal of both membranes **CPC Click** Audible confirmation of assembly 1/4 sanitary termination Minimizes transitional flow disruptions with straight bore throughout upstream processing

This graph is intended to give you a general idea of the performance capabilities of each product line. The shaded area of the graph represents the operating range of the product family, i.e. upper and lower values are shown. Therefore, depending on the exact coupling configurations selected, you can reasonably expect values to fall within the shaded area.

Flip-Click-Pull Assembly Procedure

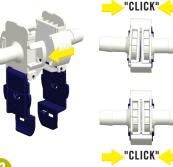

Unsnap and flip down the protective pull tab covers on each connector half.

Align the connector halves with the pull tabs hanging down. Slide the two halves together. Independently squeeze each side of the connector until you hear an audible "CPC Click."

To complete the connection, simply snap the pull tabs together by pushing on the CPC logos and pull the membranes from the connector.
